

CASE 0780504 EVIDENCE REPORT

EVIDENCE — Anonymous Note

Ten days after the crime, the department received an anonymous letter addressed to Sheriff Cooper. Fingerprints and hair strands found on the letter did not match IAFIS or local databases. They belong to a 30-40s woman with brown hair, consistent with eyewitness descriptions of the attacker's accomplice.

We do not yet understand the motive for the attack nor the purpose of this letter. Suspects seeking to taunt typically write letters to the press while suspects writing the authorities tend to have guilt or situational motives.

Even a man who is cured in part.
by running west for light
Would become a wolf under wolf's waxed morn
and eat me with delight.
Before the bite he loved me so.
and after our sprint began
Escaping night always our fate.
Your suspect is not WOLFMAN
